

1                   **(BSP December 2, 2002)**

2                   **Quality Assurance For Polyester Concrete Overlay**

3                   The Contractor shall arrange to have the suppliers of the polyester resin binder and  
4                   HMWM resin furnish technical service relating to application of material and health  
5                   and safety training for personnel who are to handle the polyester concrete and the  
6                   HMWM resin prime coat.

7  
8                   On-site supervisors, and all personnel operating the mobile mixer and finishing  
9                   machines, shall have successful previous experience in mixing and placing  
10                  polyester concrete overlay. Documentation of project experience with polyester  
11                  concrete overlay shall include the name and location of the project, the Contracting  
12                  Agency of the project, the area quantity of overlay placed, and the name and  
13                  current phone number of the Contracting Agency's contact person for the  
14                  referenced project.
